KAMIKAZE AUTONOMOUS UNDERWATER VEHICLE

KILIÇ 200 Kamikaze Autonomous Underwater Vehicle is a long-range, unmanned and expendable underwater system designed to detect, track and neutralize maritime targets such as subsea/surface platforms.

System Features

- 100 nm Mission Range (200 nm with Extra Battery)
- 350 cm Length
- 32,4 cm Diameter
- Integrated Warhead
- Satellite Communication

Key Functions

- Can be Used in Asymmetric Warfare Operations
- Autonomous Operation
- Swarm Operation Capability
- Low Detectability
- AI-Supported Visual Localization and Target Detection
